

Solving and Graphing One-Step Inequalities

Explore

Name KEY
Date _____ Period _____

To solve a linear inequality:

- Solve the inequality the same way you would an equation.
- Remember when multiplying or dividing by a negative # to reverse the inequality symbol.
(Flip)
- Graph the inequality on a number line.

1. At an online bookstore, Mary bought 6 copies of the same book for herself and her friends. She received free shipping because the total was over \$45.

Write and solve an inequality that could be used to find the minimum cost of each book.

$b = \text{book}$

$$6b > 45$$

$$b > 7.50$$

Solve and graph each inequality.

$$y + 14 \geq 32$$

$$\begin{array}{r} y + 14 \geq 32 \\ -14 \quad -14 \\ \hline y \geq 18 \end{array}$$

$$\frac{x}{3} \leq 7(-3)$$

$$x \geq -21$$

$$-24 > 6a$$

$$-4 > a \text{ or } a < -4$$

5. Which inequality symbols needed to be switched in problems 1 - 5? Why?

#3 because it was multiplying by a negative.

6. Give two examples of inequalities where the symbol needs to be switched.

① $-8b > 32$

② $-\frac{1}{3}x \leq 5$

Linear Inequalities LI5

Choose the inequality or equation that best matches the situation.

7. Mr. Samuels works for a real estate office that pays its agents 7% of their sales. How much real estate will Mr. Samuels have to sell to earn a minimum of $\$4,200$?

A. $0.07 + s < 4200$

B. $0.07s \leq 4200$

C. $\frac{s}{0.07} n = 4200$

D $0.07s \geq 4200$

8. Stacy is making punch for a party. She has 225 oz of punch and is serving it in 5 oz cups. Stacy wrote the inequality $225 \geq 5n$ to find the maximum number of cups of punch she can serve. Solve Stacy's inequality.

$$\frac{225}{5} \geq \frac{5n}{5}$$

$$45 \geq n$$

cups

9. Find the student that solved the inequality correctly. Identify the errors of the other two.

Error	Xavier	Yolanda	Zorie
	$4 - x > 10$ $-4 \quad -4$ $-x > 6$	$4 - x > 10$ $-4 \quad -4$ $-x > 6$ $-1 \quad -1$ $x < -6$	$4 - x > 10$ $-4 \quad -4$ $-x > 6$ $-1 \quad -1$ $x > -6$

Solve and graph each inequality.

10. $x + 14 < -16$
 $-14 \quad -14$
 $x < -30$

12. $\frac{k}{5} > -8$
 $k > -40$

11. $5z \geq 11 + z$
 $-11 \quad -11$
 $-6 \geq z$ or $z \leq -6$

13. $96 \leq -8p$
 $-8 \quad -8$ \star reverse symbol
 $-12 \geq p$
