When the air conditioner inside a car is turned on, the temperature inside the car decreases at a constant rate. The table below shows the temperature  $t$  in degrees Fahrenheit  $m$  minutes after the air conditioner is turned on.

Number of Minutes After Air Conditioner is Turned On	Temperature in Degrees Fahrenheit
2	80
4	75
8	65
10	60

$a = -2.5$   
 $b = 85$

$11$   $57.5 \rightarrow -2.5$

Based on the data in the table, what is the temperature inside the car when the air conditioner has been turned on for 11 minutes?

$y = -2.5x + 85$   
 $y = -2.5(11) + 85$

$y = 57.5$

$57.5^\circ$

Based on the data in the table, what was the temperature inside the car when the air conditioner was first turned on?

when  $x = 0$   $y$ -int  $85^\circ$

6	255
8	325

$45$   
 $70$   
 $70 = 35$   
 $115$   
 $70$   
 $45$

Based on this information, which statement is true?

- a. The bar weighs 35 lb without any plates.
- b. The bar weighs 70 lb without any plates.
- c. The bar weighs 45 lb without any plates.
- d. The bar weighs 25 lb without any plates.

2. Mario plans to put his first paycheck into a savings account and add a certain fixed amount each month to save for a car. After a few months, he decided to make a table to keep track of his balance in the account. Below is the table Mario created.

Number of Months	Account Balance
3	455
5	545
6	590
9	725

Write an equation to represent the total account balance  $a$  for any number of months,  $m$ .

$$a = 45m + 320$$

What was the amount of Mario's first paycheck?

$$m = 0$$

$\$320$

If Mario increased his rate of deposit by \$10 each month, how much money would he have in 12 months?

$$a = 55m + 320$$

$$a = 55(12) + 320$$

$$a = \$980$$

$\$980$

3. As scuba divers descend, the pressure of the water increases. Scuba divers can determine their depth by the pressure. Pressure can be expressed in atmospheres. An atmosphere is equivalent to 14.7psi (pounds per square inch) of pressure. The table below shows the relationship between atmospheres of pressure and ocean depth.
